Why not contribute to this by using the forms provided at the end of this manual to pass on suggestions or report problems? Simply fill in a photocopy of the form you wish to use, and send it to the Textronics address given on the cover of this guide.

If you wish to contact us by email, useful addresses include:

Mailto: archive@textronic.net for comments on documentation
Mailto: marketing@textronic.netfor product and sales inquiries

You can also visit our website (https://www.textronic.com)to discover more about us and our latest products and services.

Introduction

Design Archive is an intelligent design data management system which hosts a comprehensive library created over a period of time.

The data can be accessed by various hierarchies/departments of the organization for their specific requirements with predefined rights and permission for design data and corporate security.Sales person can communicate design and style requirements while on tour and his request for customer-oriented development.

Design Archive is an intelligent design management system to manage your important and ever evolving enormous database of designs created over years.

Design Archive is a versatile and flexible integrated software solution.
Design Archive creates, presents, produces and delivers the collection and/or customer requested products more cost and time effectively.
Design Archive increases the sales and reduces cost resulting in fast ROI for the company.

Design Communications are usually based on physical samples/ CAD for sales, production, outsourcing, etc.Customers refer to their own styles and requirements, searching for them in your warehouse/ physical sample files becomes more time consuming.Travelling salesman can carry limited amount of samples with him.Fabric info unavailable like stock data and other technical or commercial.Typical to Management of customer related data of selection or orders as a records.

The fabric swatches and designs are digitized as CAD files / Scanned fabric images with Technical parameters and Physical attributes.
Production enhances efficiency, infranatant search and retrieval of designs during sales, asking creativity and business.The data stored in the archive can be accessed by various hierarchies/ departments of the organization for their specific requirements.
